

Make the most of your Waterwise endorsement WGIP Edition

Waterwise Programs Website

The company is currently featured in the directory within the Garden Irrigator category. The website was established with the dual purpose of encouraging the community to avail the services of certified members and providing education on Waterwise efficiency practices. Customers have the option to contact your company directly and access detailed information about your services.

Click [HERE](#) to visit the website!

If applicable: The business will also be discoverable via the Water Corporation's website
<http://www.watercorporation.com.au/save-water/search-for-waterwise-services>
(This website is exclusively managed by Water Corporation and any alterations to the content is their responsibility).

Waterwise logo/s

**16mm Minimum size
including keyline**

By displaying the logo, you are promoting your Waterwise status and helping to increase the visibility of the logo within the community.

Please note, that approval is NOT required for business cards and general stationery and inclusion on your website and facebook page, as long as a high-resolution logo is used.

Please be aware that prior to printing or dispatch of any advertising materials not listed above bearing Waterwise logo, approval must be sought from their Corporate Communications area. Please direct your approval request through the Irrigation Australia WA Office, allowing up to 48 hours for the approval process.

1. The logo has been provided in multiple formats. Please adhere to the size constraints of 16mm Minimum size. (regardless of colour variation)
2. Use the logo actively in advertising and business materials – invoices, email signature, website, facebook page, etc

Please note copyright law applies to both logos.

Sprinkler Run Time Flyers

Sprinkler Watering Run Times

It's important to remember that different types of sprinklers have different watering run times. The table below can be used as a guide if you need to program your controller.

Approximate watering rate (per hour)	15-20mm	35-45mm	35-45mm	10-15mm	10-20mm
Suggested run time to apply 10mm standard drink (for sandy soils)	30-40 minutes	13-16 minutes	13-16 minutes	40-60 minutes	30-40 minutes

Need expert advice? Contact your local Waterwise Garden Irrigator or Waterwise Irrigation Design Shop for help.

DO YOU NEED HELP WITH YOUR IRRIGATION SYSTEM?

WATERWISE ENDORSED MEMBERS ARE FULLY TRAINED IN WATER EFFICIENT PRACTICES AND CAN DESIGN, INSTALL, REPAIR AND MAINTAIN YOUR IRRIGATION SYSTEM.

Whether you are starting from scratch or wanting to improve your existing system, talk to a Waterwise Garden Irrigator for professional irrigation design, installation and maintenance services.

If you prefer to do-it-yourself, get expert advice and quality parts from your local Waterwise Irrigation Design Shop (retail outlet).

To find a Waterwise professional in your local area, simply scan our QR code to search the Waterwise Irrigation Directory, or visit our website www.waterwiseprograms.com.au

Search the Waterwise Irrigation Directory

Alternatively please contact us on: adminsupport@irrigation.org.au | www.waterwiseprograms.com.au

These flyers serve as a valuable tool for educating the community on proper irrigation run times, promoting endorsed members, and highlighting the Waterwise Programs. An electronic version is available for inclusion on websites, quotes, and more.

As part of your WGIP endorsement, it is expected that you distribute these flyers to your customers to educate them about the appropriate sprinkler run times.

Catch Cups (if applicable)

Catch cups (graduated measuring containers) are a valuable tool for testing how efficiently an irrigation system is operating and the sprinkler application rates.

These catch cups are regularly supplied at Waterwise Irrigation Design Shops throughout the year and are available to customers free of charge. We kindly request that you become familiar with their usage in case customers seek assistance on how to use them.

Instructions:

- spread catch cups or containers of the same size randomly around the watering zone
- make sure they are at least 1 metre from the closest sprinkler
- time how long it takes the sprinklers to fill the catch cups to the depth of 10mm – this is the standard drink for an area of sandy soil.

Controller Cards

These tools play a crucial role in educating your customers on the optimal operation of their irrigation system. It is imperative that you provide customers with a controller card so they have access to all the pertinent and essential information.

Your irrigation controller has been programmed to be waterwise

For ongoing maintenance queries, please contact:

Name: _____

Phone: _____

Your irrigation system is now set to run on your allocated watering days:			
Monday	Tuesday	Wednesday	Thursday
Friday	Saturday	Sunday	

Station No.	Area description	Sprinkler type	Maximum run time
Station 1			
Station 2			
Station 3			
Station 4			
Station 5			
Station 6			
Station 7			
Station 8			
Station 9			
Station 10			
Station 11			
Station 12			

It's easy to 'set and forget' your irrigation system. It's important to regularly check that your system is working correctly, you can do this by:

- Regularly checking for leaks.
- Ensuring your back-up battery is kept charged.
- Asking a Waterwise Garden Irrigator or visiting a Waterwise Irrigation Design Shop, for advice and other tips, they have been trained to help you save water by providing waterwise advice, products and services.

Seasonal adjustment setting

As the seasons change, so do the water needs of your lawn and garden. The table below shows the adjustments that should be made to your irrigation controllers 'Seasonal Adjustment' setting to avoid over watering.

No matter what the season, your controller should always be turned off when it's raining.

Time of year	Seasonal adjustment (most suited to Perth and the South West)
January-February	100%
March	80%
April	60%
May	Manual operation of controller as necessary
June August	System turned off (winter sprinkler ban)
September	Manual operation of controller as necessary
October	60%
November	80%
December	90%

*A permanent winter sprinkler ban applies to scheme and bore water users in Perth, Mandurah and parts of the South West between 1 June and 31 August each year.

Sprinkler watering rates

It's important to remember that different types of sprinklers have different watering rates. By reducing sprinkler run times you will save water and your garden can still look great. The table below can be used as a guide if you need to reset your controller.

Sprinkler type	Approximate watering rate (per hour)	Suggested run time to apply 10mm (standard drink)	Recommended run time for reducing water use
Pop-up/fixed spray	35-45mm	13-16 minutes	10 minutes
Rotary	10-15mm	40-60 minutes	30-40 minutes
Gear drive rotor	10-20mm	30-40 minutes	25-30 minutes
Dripline	15-20mm	30-40 minutes	20-30 minutes
Micro spray	35-45mm	13-16 minutes	10 minutes

If you are establishing a new garden or lawn, you may be eligible for a watering exemption in order for it to become fully established. For more information about exemptions and how to be waterwise call 13 10 39 or visit watercorporation.com.au

Waterwise Programs Facebook Group

The Waterwise Programs facebook group is exclusive to actively Endorsed members of the Waterwise Programs.

This forum is to assist members with any industry updates exclusive to members, support, advice, and recommendations from the Waterwise Sub-Committee along with other endorsed members on anything related to irrigation.
